Course Outline:

Learn the ancient art of mosaic in a fun welcoming environment. In this more in-depth course students will learn the basic skills of mosaic techniques with a twist of modern expression. Students will begin by transferring a design on a 12"x12" base. After learning about the variety of materials, choice of adhesive, design and composition as well as the cutting and laying out of tiles and the grouting process, they will begin the process of creating their own piece. The goal is that in the course of 6 weeks students will have all the knowledge and skills needed to tackle larger and more complicated projects on their own. (No artistic experience required).

Course Materials:

The price of the class includes all required material and shared use of tools.
