Course Outline:

Students have the unique opportunity to work alongside a jeweller who has exhibited and sold pieces in local art galleries. This mentorship encourages the students to learn by doing, and they will experience the many creative possibilities in the world of jewellery-making. We will be working with black steel, thicker copper wires, gems, glass beads and shared tools will be available for the class. The collaborative approach makes this a fun course.

Course Materials:

The cost of the class includes all required materials.
